

EDUCATION

Bachelor of Technology, Mukesh Patel School of Technology
Management and Engineering, NMIMS Information Technology
(Integrated) 2021 - 2028

TECHNICAL SKILLS

Frontend | Tailwind CSS, JavaScript, HTML, CSS, Angular JS
Backend | MySQL, Python, PHP, C, C++, Node
DevOps | Linux, Bash, Bash Scripting
Miscellaneous | GitHub, Figma, Prezi, Canva, AutoCAD, cisco network packet

WORK EXPERIENCE

Technical Intern for web designing – United way Mumbai June 2025 – July 2025
United Way Mumbai – unitedwaymumbai.org , Mumbai

- Developed and deployed a lightweight, responsive NGO website to improve information accessibility.
- Integrated Google Sheets as a backend CMS, enabling non-technical staff to update live content in real time.
- Built internal tools to streamline data entry and reduce manual update effort.
- Collaborated with cross-functional teams and led technical decision-making under tight deadlines.

PROJECTS

Portal | HTML, CSS, Backend

- Developed an intuitive project portal with a clean, user-friendly UI.
- Implemented a role-based login system with two interconnected interfaces based on user category.

Budget Manager | Python, Finance Engine, GUI

- Built a custom Python finance engine with an interactive GUI that supports move undo, board flip, and menu controls.
- Integrated Excel/data entry features enabling automated spending insights and decision support, all coded from scratch.

NGO Activity & Biodiversity Dashboard | HTML, CSS, PHP, MySQL

- Built a web-based dashboard to track NGO activities by category and event type.
- Implemented a biodiversity module with slideshow widgets, auto-generated detail pages, and editable content storage.
- Designed a delete-sync system to maintain consistency across images, data files, and generated pages.

Event Management Website (Ocassio) | HTML, CSS, Node.js, AngularJS

- Engineered an automated ticketing pipeline that triggers instant, personalized HTML email dispatch upon payment verification.
- Designed a robust backend using a dedicated /sendTicketEmail endpoint ensuring reliable, high-volume, error-controlled ticket delivery.

Hotel Management Network | Cisco Packet Tracer

- Built a multi-building network where all devices share a unified static IP-based WiFi system.
- Designed signal tracing to monitor packet flow, inter-block communication, and seamless building-to-building connectivity.

School Management Network | Cisco Packet Tracer

- Designed a campus network linking multiple buildings via DHCP servers, SSH access, and ICMP-based communication.
- Implemented packet tracing and signal routing to ensure efficient, secure, and monitored network operations across all blocks.
